

When someone is horribly injured because they aren't given proper safety equipment during construction or a drunk driver inflicts injury or death - ripping a family apart forever. People turn to a plaintiff's lawyer for help.

When big business puts a dangerous product on the market letting the public pay for the result of greed - so that the corporation can profit at your expense. The civil justice system is your ONLY forum to seek full, fair and adequate compensation.

This is Bob Brenna Jr., from the law firm of Brenna and Brenna telling you I am proud to represent people whose lives have been changed because someone else's negligence has victimized their lives.

A catastrophic injury can impact someone forever, and when big business or the insurance industry tries to fool you into believing we don't need a system to protect your rights - don't buy it - don't give up your rights.

This country is founded upon the principal that even the little guy deserves justice. I am proud to represent people when they need someone to help them put their lives back together after a catastrophe occurs because of someone else's negligence.

Don't give up your rights - without a fight!
